

PhD Modules

1. For students beginning in September 2012, departmental regulations require PhD students to participate in four (4) tutorial modules, including at least one experimental and one tutorial module, in specialized areas of Pharmacology unrelated to your specific research interest.
2. Students should submit their "*Planned PhD Module Sessions*" form within the first year of enrolment in the program. Module choices should be made in consultation with your supervisor(s) and supervisory committee members. Prior approval of the supervisor, supervisory committee and Graduate Coordinator is required. (See Welcome Package)
3. A half course (which is IN ADDITION TO your required minor subject) may be counted in lieu of **one** of the tutorials. Prior approval of the supervisor, supervisory committee and Graduate Coordinator is required.
4. The satisfactory completion of each module will be recorded for departmental files by return of the signed "*Completion of PhD Tutorial Session*" form.
5. Students must complete their Module requirements by the end of their third year of enrolment in the PhD program.
